

New Slimline Collection

Introducing Designs of Distinctions new Slimline Collection of low-profile accents for kitchen, bath and furniture.

Understated, Contemporary, Clean...these are all attributes of today's kitchen design, but that doesn't mean decorative embellishment have disappeared entirely. It just means they are more subtle, elegant and designed to blend. Designs that scream "LOOK AT ME" are gone, and instead replaced with little discoveries of "Ohh, I really like that "...

Slim profiles such as 2" support posts and columns, low-profile light rail moulding that works with frameless cabinetry, narrow, satin metallic trim that adds a warm glow and shallow brackets all work beautifully with today's slimline shaker and slab style cabinet doors.
