### 17 Profiles & 5 Wood Species of Tambour

**(Chicago, IL):** Designs of Distinction<sup>®</sup>'s [DOD] line of Tambour includes a growing number of solid and flexible profiles in 5 wood species – Red Oak, Hard Maple, White Oak, Walnut, and Paint Grade Poplar.

Whether you call it beaded, reeded, fluted, or Tambour, DOD continues to add both solid and flexible Tambour profiles to its line of stock components. Made in America from American hardwoods, Tambour ships ready to finish in paint or stain. Currently, DOD carries 17 Tambour Profiles, with new profiles to launch in Summer 2023.

**Flexible Tambour** has a thin backer, allowing Tambour to be used as a wrap and bend around curves. Stocked in panels that are 12"W x 48"L or 12"W x 96"L. Easy to install with construction glue and finishing or brad nails.

**Solid Tambour** profiles, stocked in 24"W x 46"L panels, make an ideal insert for cabinet doors, or as full panels on cabinetry and furniture.

DOD's Tambour Profiles can be used in both commercial and residential applications, and can be used as column wraps, furniture and cabinetry skins, or as full wall coverings. Tambour is in demand for a wide variety of applications!
